

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

준선과 초점이 있고, 초점을 시작점으로
하는 반직선이 있을 때, 그 반직선과
만나는 포물선 상의 점을 작도하라.

(With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.)

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

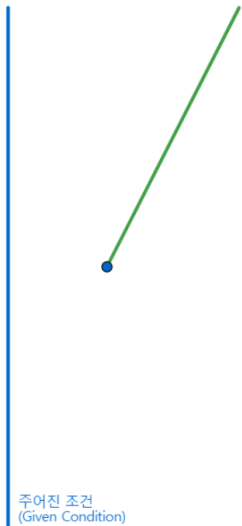

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

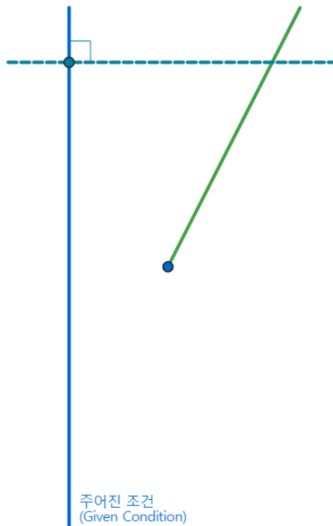

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

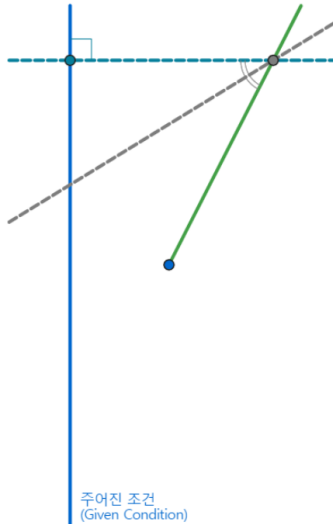

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

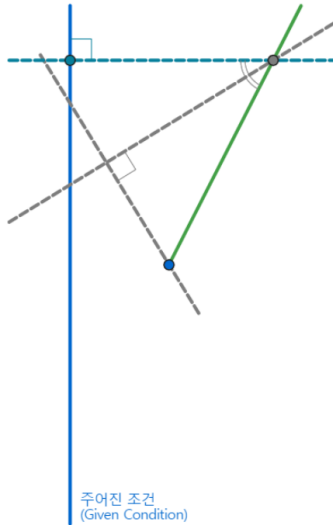

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

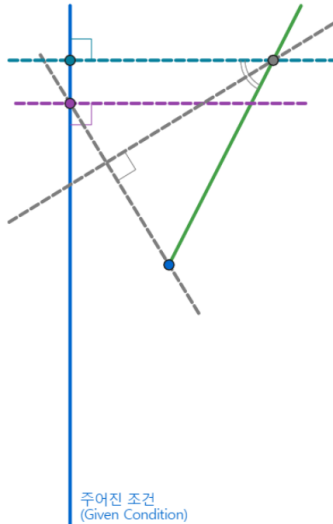

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

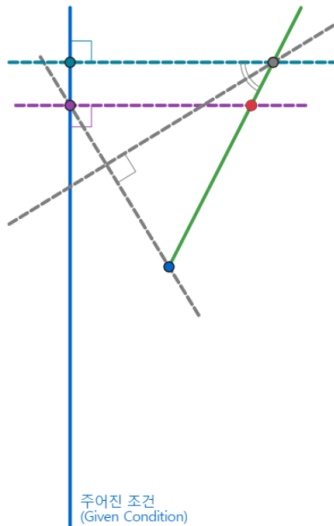

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

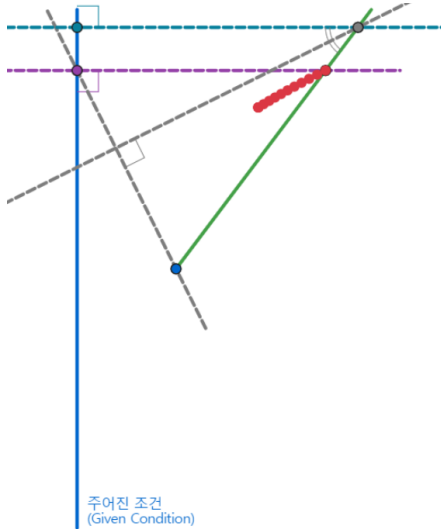

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

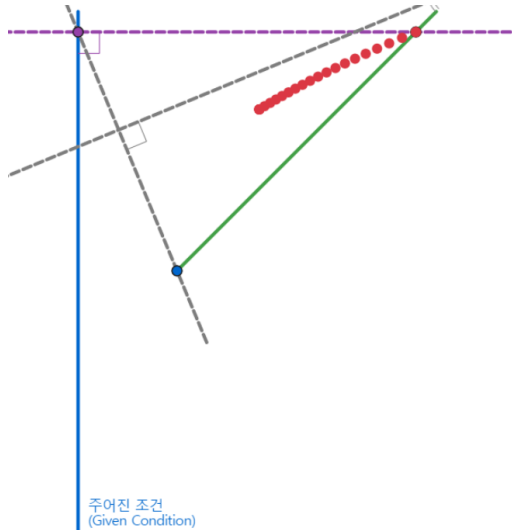

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

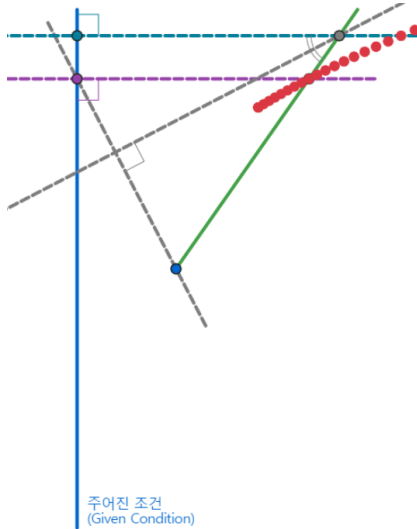

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

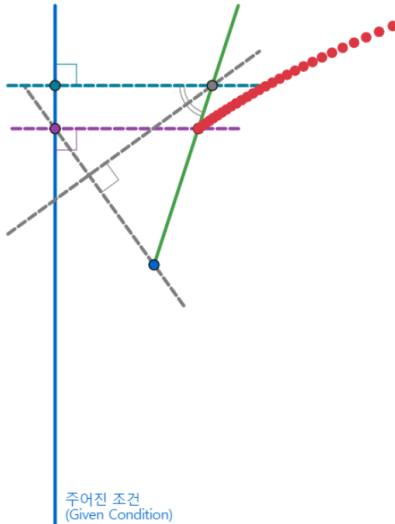

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

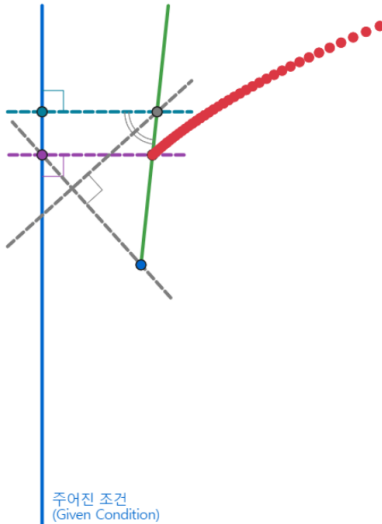

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

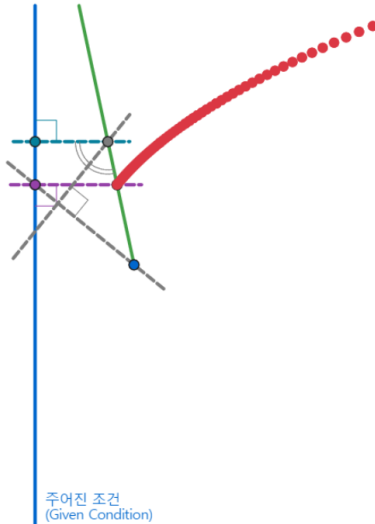

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

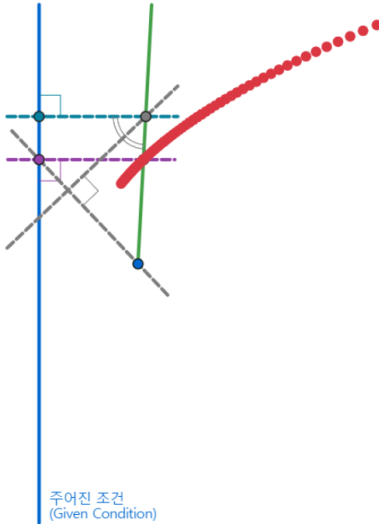

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

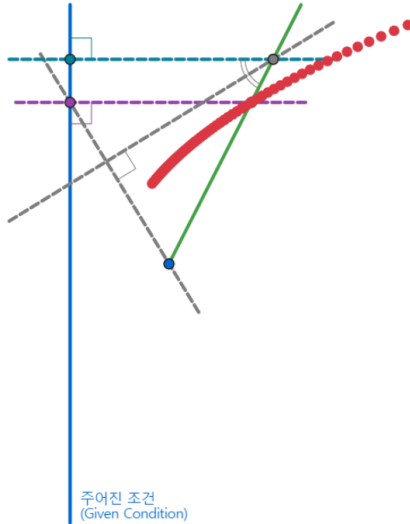

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

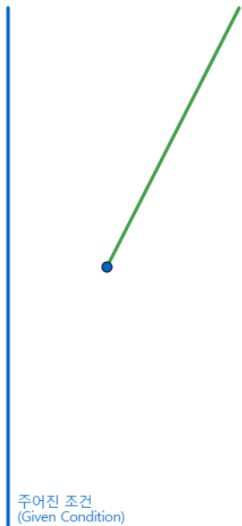

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

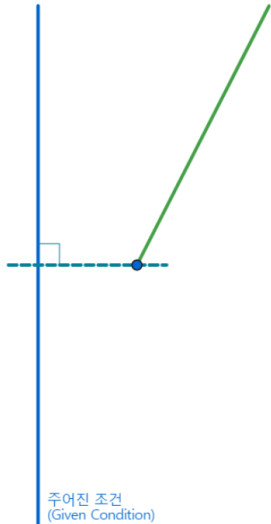

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

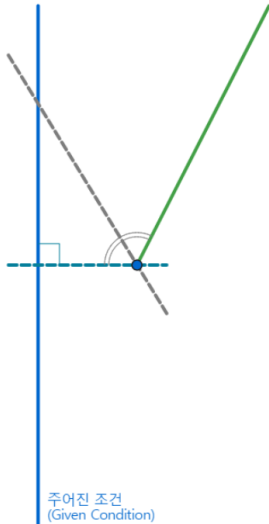

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

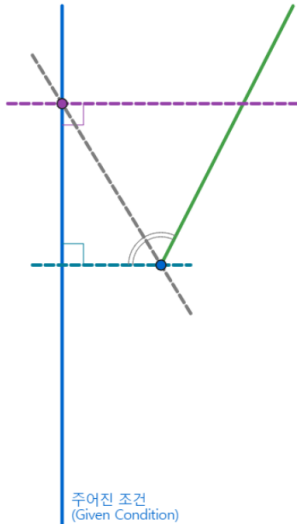

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

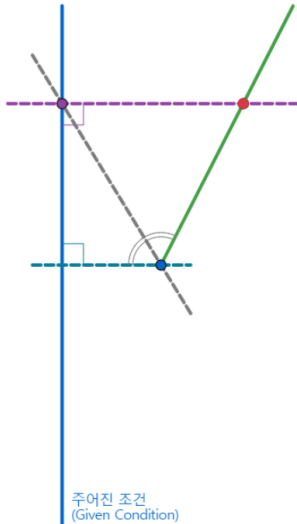

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.

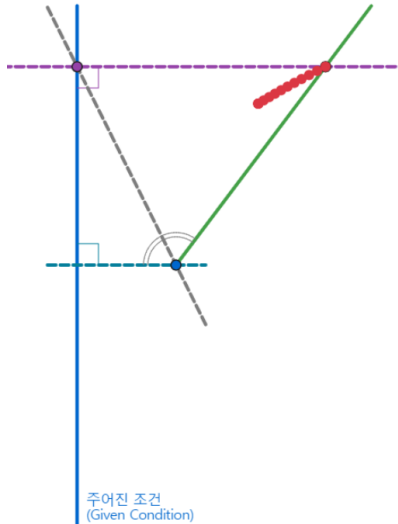

With a directrix and a focus when a ray starting from the focus is given, draw a point on the ray passing the parabola.
