

If there is a focus and its directrix of a parabola and a point inside of it, draw a line crossing the point and making it the middle of the intersection point passing through this parabola.

포물선의 초점과 준선이 있고 포물선 내부의 한 점이 있을 때, 그 한 점을 지나면서 포물선과 만나는 두 교점의 중점이 그 한 점이 되도록 하는 직선을 작도하라.

(If there is a focus and its directrix of a parabola and a point inside of it, draw a line crossing the point and making it the middle of the intersection point passing through this parabola.)

If there is a focus and its directrix of a parabola and a point inside of it, draw a line crossing the point and making it the middle of the intersection point passing through this parabola.
