

수 a 에서 함수 f 의 미분
(The derivative of a function f at a number a)

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a

▶ Start

Definition

The derivative

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a ,

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) =$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_x$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

if

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

if this limit exists.

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

if this limit exists.

$f'(a)$ is read "f prime of a."

The derivative of a function f at a number a

▶ Start

Definition

The derivative of a function f at a number a , denoted by $f'(a)$, is

$$f'(a) = \lim_{h \rightarrow 0} \frac{f(a+h) - f(a)}{h} = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x - a}$$

if this limit exists.

$f'(a)$ is read "f prime of a."
