

$$5a \times 2b = 10ab$$

$$5a \times 2b = 10ab$$

$$5a \times 2b = 10ab$$

▶ Start

$$5a \times 2b = 10ab$$

▶ Start

$$5a \times 2b$$

$$5a \times 2b = 10ab$$

▶ Start

$$5a \times 2b = (5 \times a) \times (2 \times b)$$

$$5a \times 2b = 10ab$$

▶ Start

$$5a \times 2b = (5 \times a) \times (2 \times b) \quad \text{곱하기 복원}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) \quad \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b \end{aligned}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \end{aligned}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b \end{aligned}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \end{aligned}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) \end{aligned}$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \end{aligned}$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab \end{aligned}$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \end{aligned}$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \\ &= 10ab \end{aligned}$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \\ &= 10ab && \text{곱하기 생략} \end{aligned}$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \\ &= 10ab && \text{곱하기 생략} \end{aligned}$$

\therefore

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \\ &= 10ab && \text{곱하기 생략} \end{aligned}$$

$$\therefore 5a \times 2b = 10ab$$

$$5a \times 2b = 10ab$$

▶ Start

$$\begin{aligned} 5a \times 2b &= (5 \times a) \times (2 \times b) && \text{곱하기 복원} \\ &= 5 \times a \times 2 \times b && \text{괄호 생략} \\ &= 5 \times 2 \times a \times b && \text{교환법칙} \\ &= (5 \times 2) \times (a \times b) && \text{결합법칙} \\ &= 10 \times ab && \text{계산 및 곱하기 생략} \\ &= 10ab && \text{곱하기 생략} \end{aligned}$$

$$\therefore 5a \times 2b = 10ab$$

$$5a \times 2b = 10ab$$
