

The diagonal lines of a rectangle are parallelograms when they are bisected.

사각형의 두 대각선이 서로 다른 것을
이등분하면 평행사변형이다.

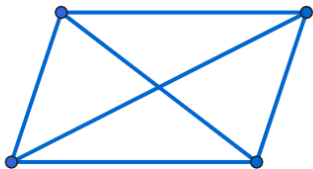

(The diagonal lines of a rectangle are parallelograms when they are bisected.)

The diagonal lines of a rectangle are parallelograms when they are bisected.

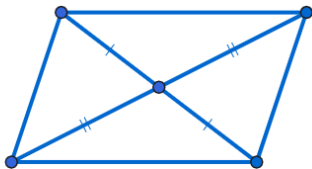

The diagonal lines of a rectangle are parallelograms when they are bisected.

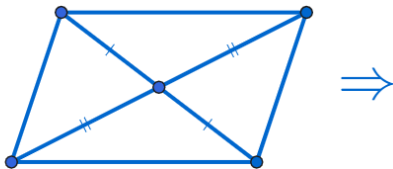

The diagonal lines of a rectangle are parallelograms when they are bisected.

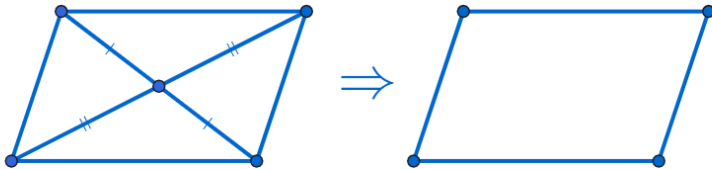

The diagonal lines of a rectangle are parallelograms when they are bisected.

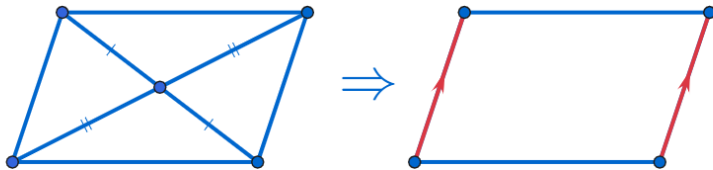

The diagonal lines of a rectangle are parallelograms when they are bisected.

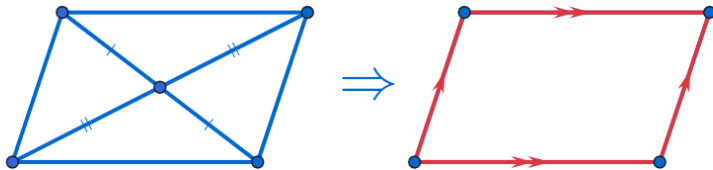

The diagonal lines of a rectangle are parallelograms when they are bisected.

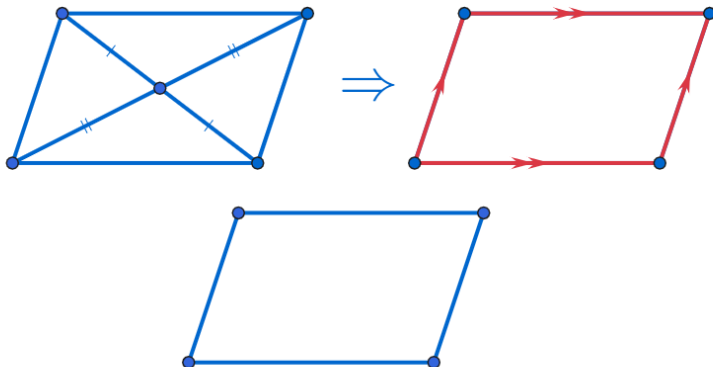

The diagonal lines of a rectangle are parallelograms when they are bisected.

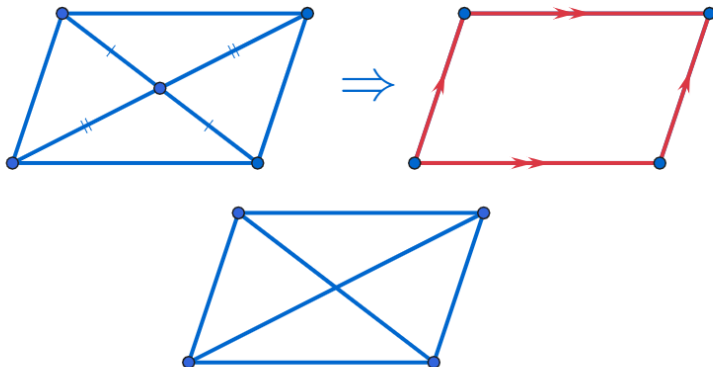

The diagonal lines of a rectangle are parallelograms when they are bisected.

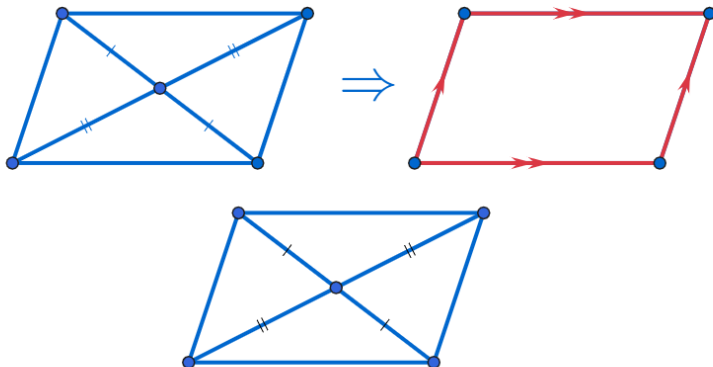

The diagonal lines of a rectangle are parallelograms when they are bisected.

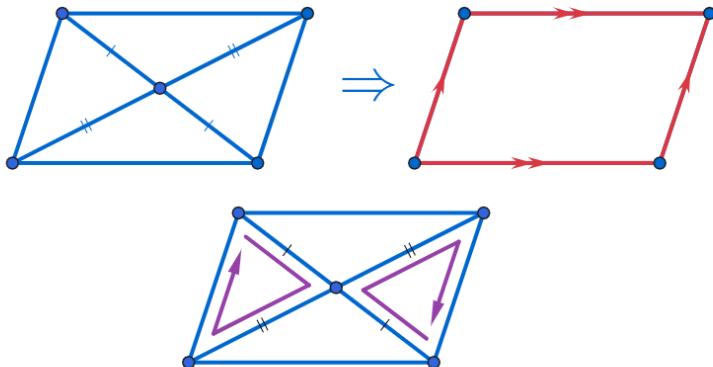

The diagonal lines of a rectangle are parallelograms when they are bisected.

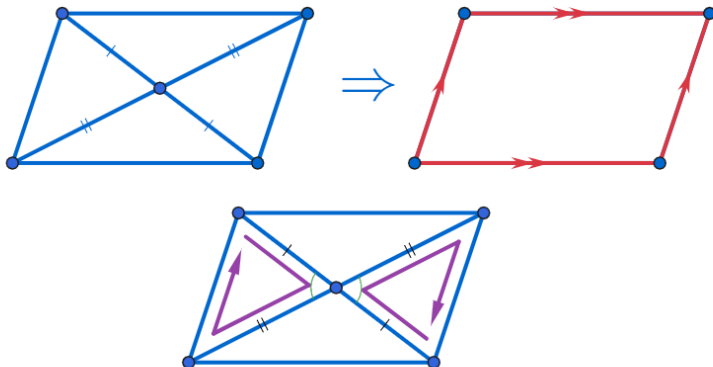

The diagonal lines of a rectangle are parallelograms when they are bisected.

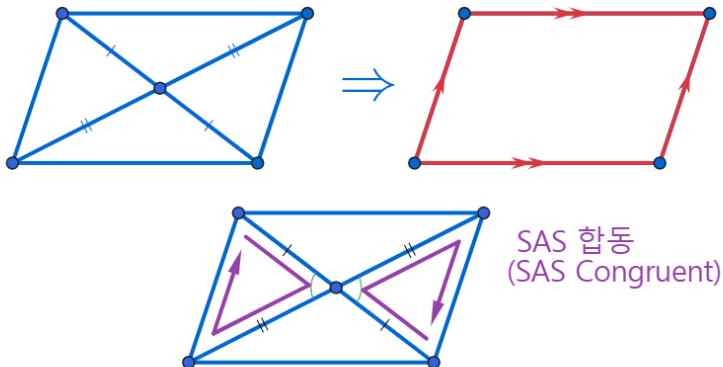

The diagonal lines of a rectangle are parallelograms when they are bisected.

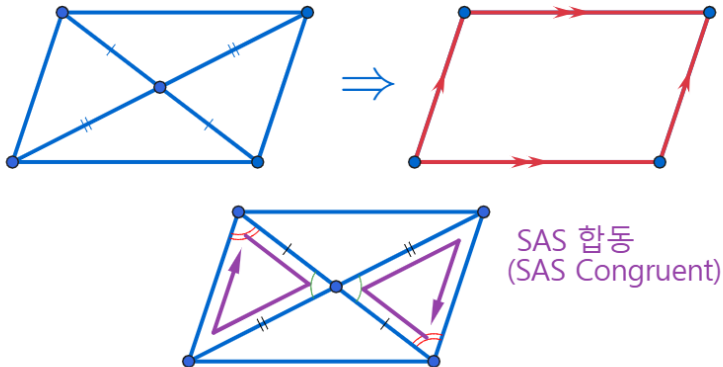

The diagonal lines of a rectangle are parallelograms when they are bisected.

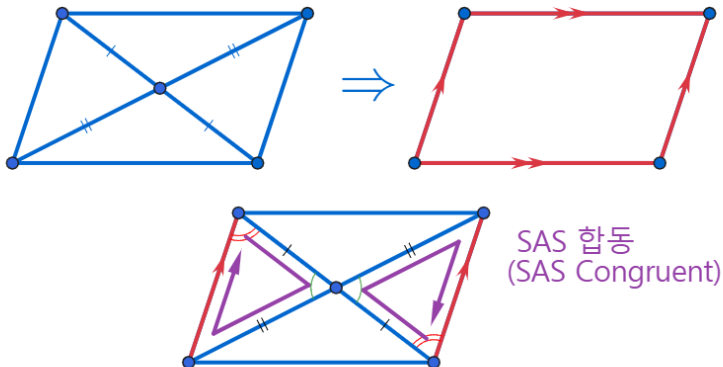

The diagonal lines of a rectangle are parallelograms when they are bisected.

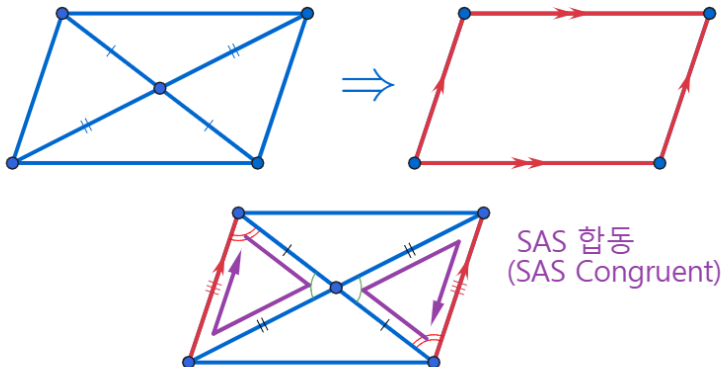

The diagonal lines of a rectangle are parallelograms when they are bisected.

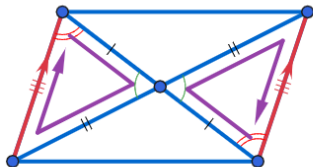

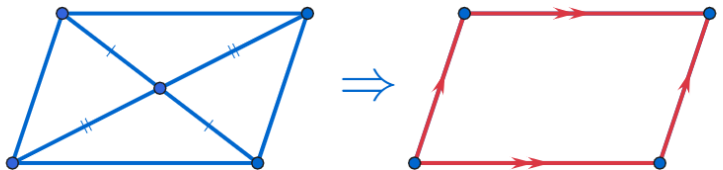

The diagonal lines of a rectangle are parallelograms when they are bisected.

The diagonal lines of a rectangle are parallelograms when they are bisected.

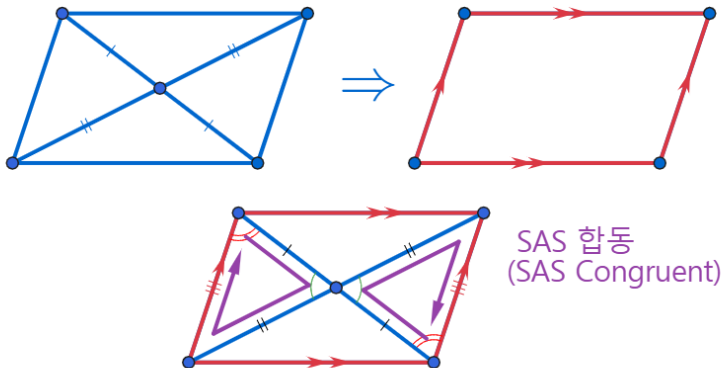

The diagonal lines of a rectangle are parallelograms when they are bisected.

SAS 합동
(SAS Congruent)

∴ 한 쌍의 대변이 평행하고 그 길이가 같은 사각형은 평행사변형이다.
(A rectangle with the same length of two pairs of parallel and opposite sides is a parallelogram.)

The diagonal lines of a rectangle are parallelograms when they are bisected.

∴ 한 쌍의 대변이 평행하고 그 길이가 같은 사각형은 평행사변형이다.
(A rectangle with the same length of two pairs of parallel and opposite sides is a parallelogram.)

The diagonal lines of a rectangle are parallelograms when they are bisected.
