(The point where the sum of the distances from the four points on the convex polygon is the minimum)

The point where the sum of the distances from the four points on the convex polygon is the minimum

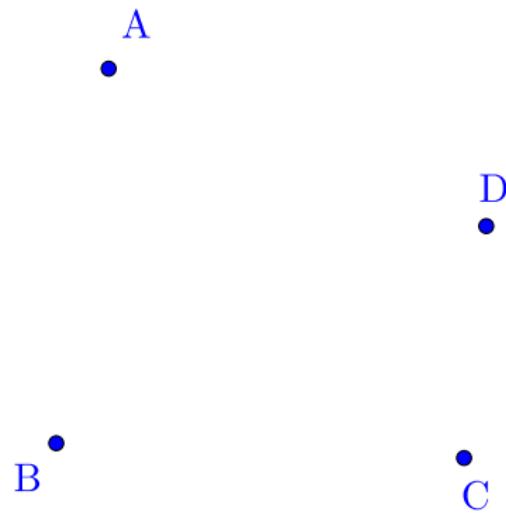

▶ Start

▶ End

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

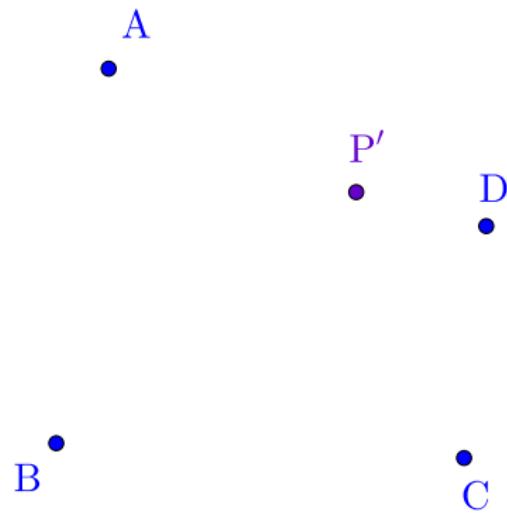

▶ End

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

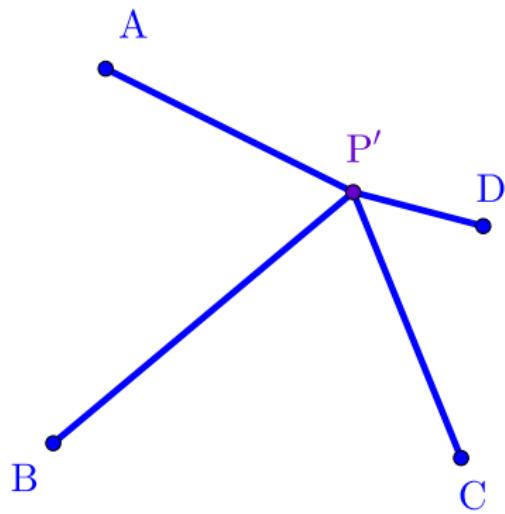

▶ End

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

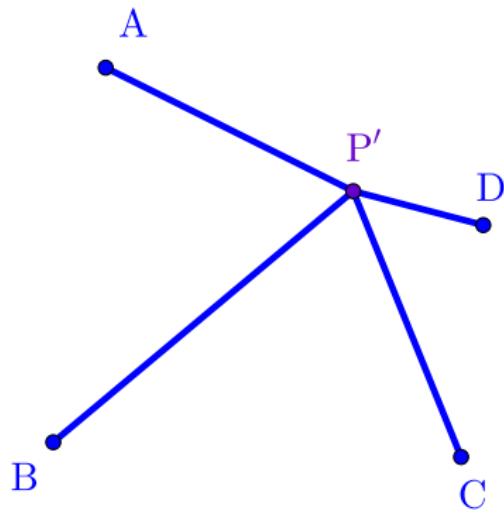

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

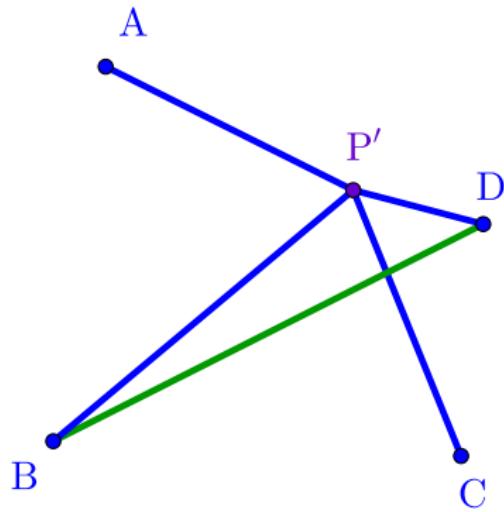

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

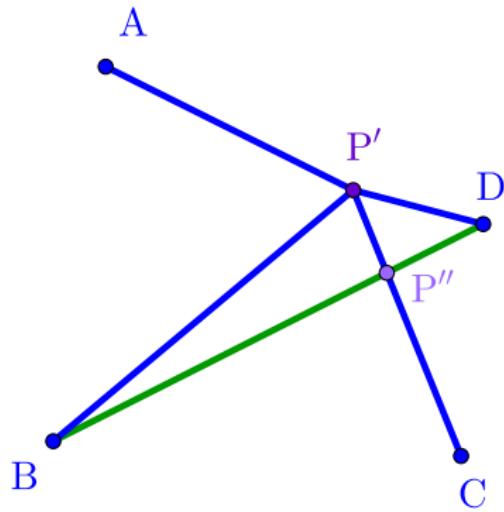

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

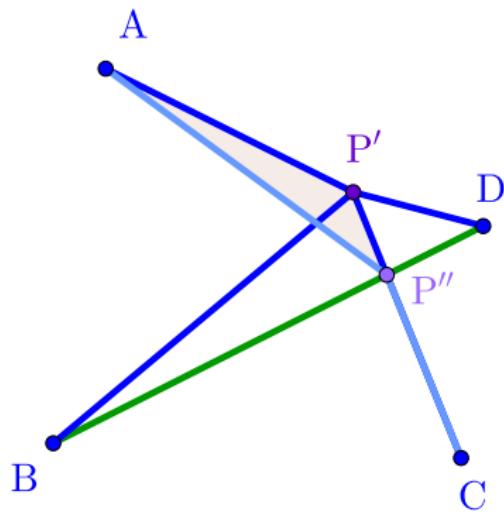

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

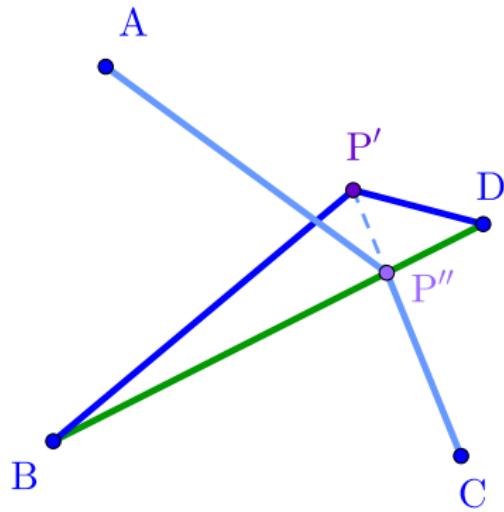

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

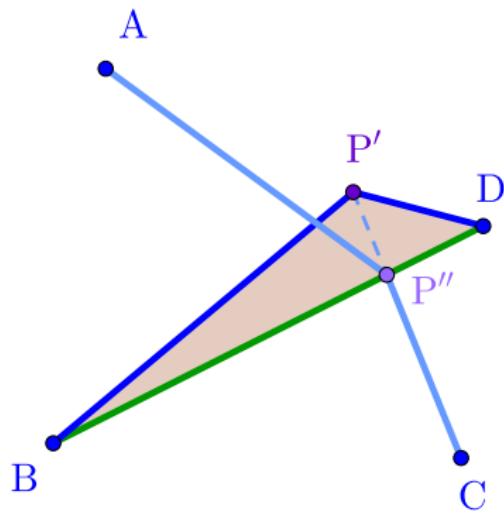

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

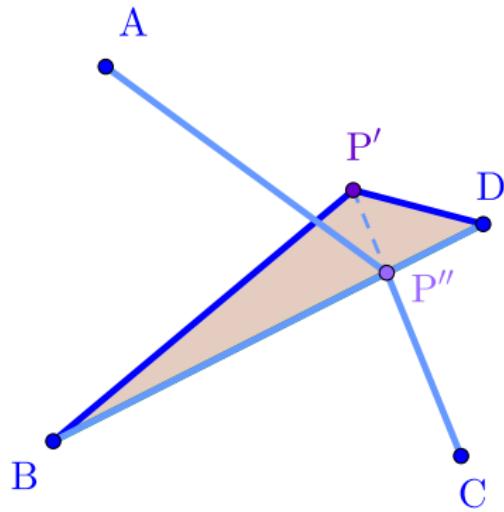

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

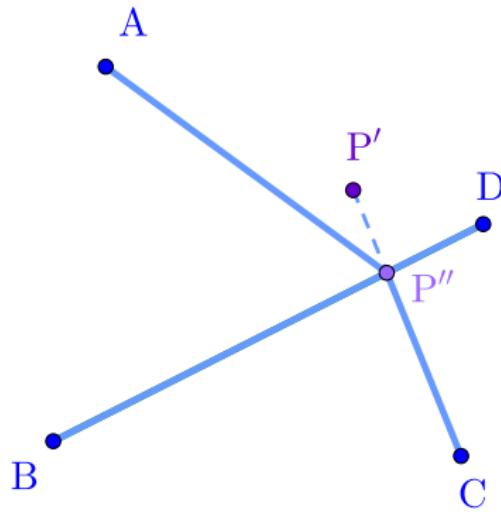

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

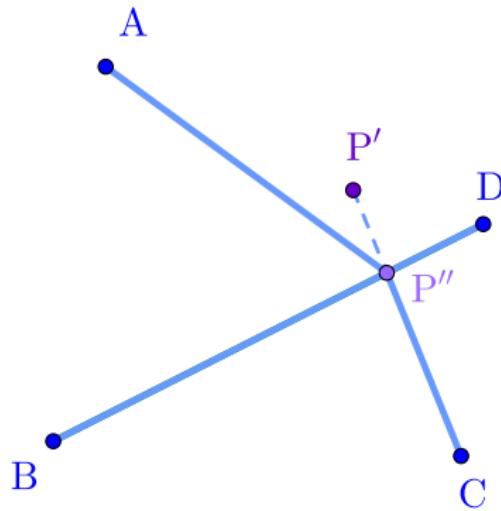

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

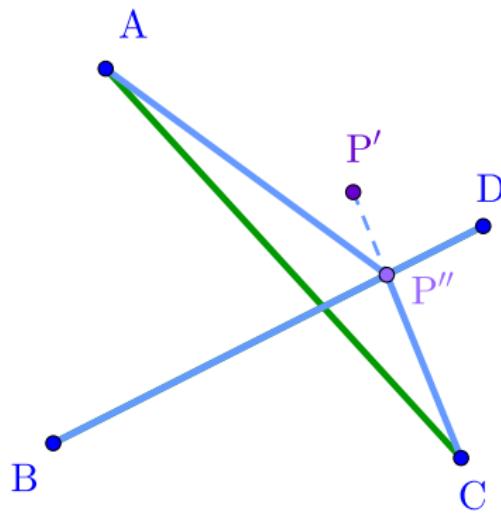

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

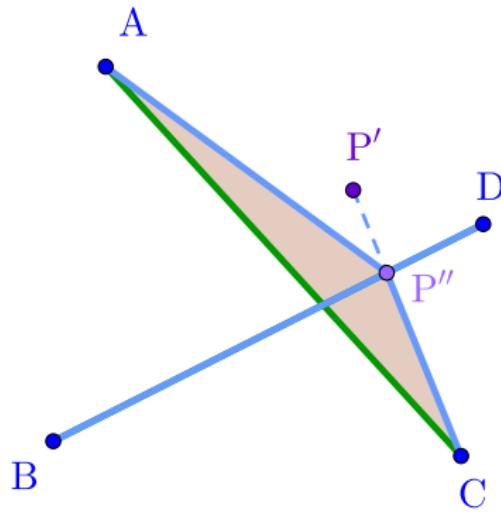

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

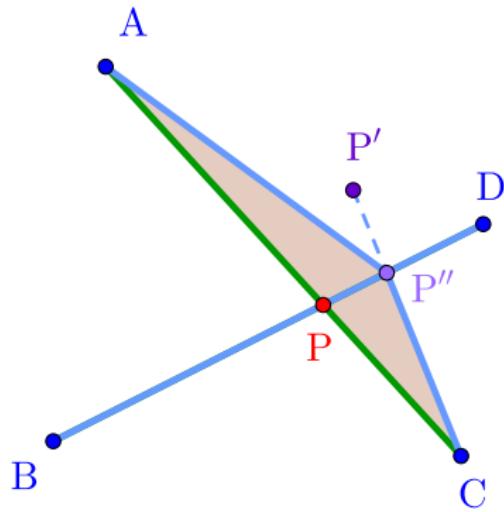

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

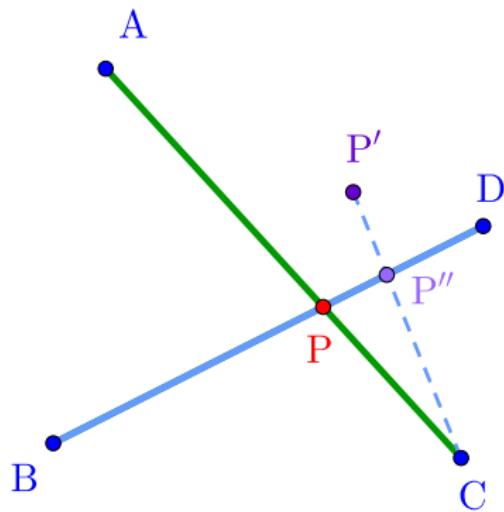

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

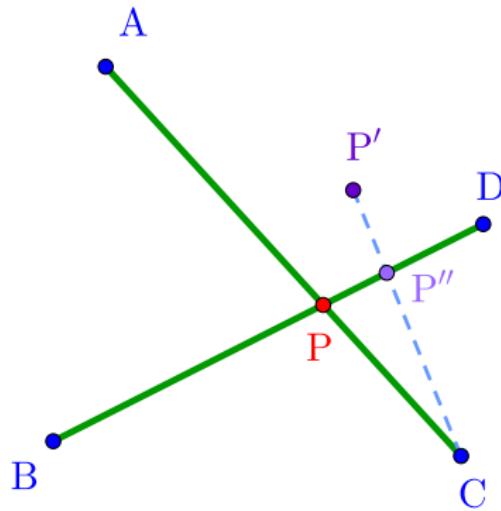

The point where the sum of the distances from the four points on the convex polygon is the minimum

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$
$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

The point where the sum of the distances from the four points on the convex polygon is the minimum

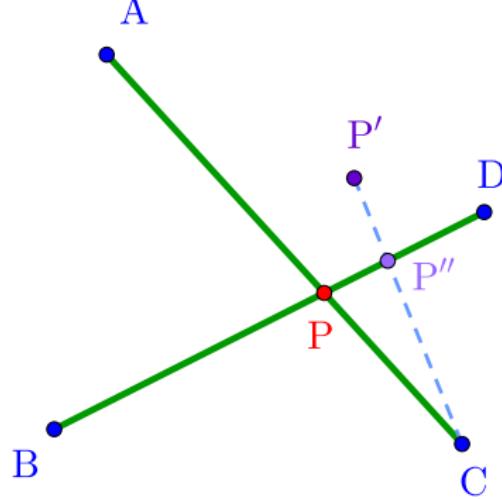

▶ Start

▶ End

$$\overline{AP'} + \overline{BP'} + \overline{CP'} + \overline{DP'} = 13.53$$

$$\overline{AP''} + \overline{BP''} + \overline{CP''} + \overline{DP''} = 12.77$$

$$\overline{AP} + \overline{BP} + \overline{CP} + \overline{DP} = 12.54$$

The point where the sum of the distances from the four points on the convex polygon is the minimum
