

With a directrix and a focus when a perpendicular line passing a point on the directrix is given, draw a point on the perpendicular line passing the parabola.

준선과 초점이 있고 준선 상의 한 점을 지나는 수직선이 있을 때 그 수직선과 만나는 포물선 상의 점을 작도하라.

(With a directrix and a focus when a perpendicular line passing a point on the directrix is given, draw a point on the perpendicular line passing the parabola.)

With a directrix and a focus when a perpendicular line passing a point on the directrix is given, draw a point on the perpendicular line passing the parabola.
