Complex Numbers

A complex number is a number

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form

$$z = a + bi$$

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit,

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$

The real number a in the complex number $z = a + bi$

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$

The real number a in the complex number $z = a + bi$ is called

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$

The real number a in the complex number $z = a + bi$ is called the real part of z

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$

The real number a in the complex number $z = a + bi$ is called the real part of z , and the real number b

▶ Start

Complex Numbers

A complex number is a number that can be expressed in the form $z = a + bi$, where a and b are real numbers and i is the imaginary unit, satisfying $i^2 = -1$.

$$\mathbb{C} = \{z \mid z = a + bi, a, b \in \mathbb{R}, i^2 = -1\}$$
