The Imaginary Unit

An imaginary number

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i :

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
  The imaginary number i is defined solely by the property

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined solely by the property
that its square is -1.

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined solely by the property
that its square is -1.

Real Number

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined solely by the property
that its square is -1.

Real Number   Irrational Number

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined solely by the property
that its square is -1.

Real Number   Irrational Number   Rational Number

The Imaginary Unit

An imaginary number is a square root of a nonpositive real number.

i : The Imaginary Unit such that $i^2 = -1$
The imaginary number i is defined solely by the property
that its square is -1.

Real Number   Irrational Number   Rational Number
